

Hi good people,

If you are concerned about the increase in living costs and the fact that the government is doing nothing about it, then I have some helpful info you might like. At 1pm Sunday, on the 21st of November there will be a nation-wide protest by Groundswell NZ. This is likely to take place at Cathedral Square and the surrounding area, with the Agricultural Grounds (Curllett's Road motorway) being used as the staging area.

Now, you may wonder why I mention this in a letter. Simple, really. The New Zealand Government is working against our national interests, in favour of a One World Order, as described by David Rockefeller. The government wants to shut down farms and force everyone to live in tiny apartments, with no access to a private motor-vehicle. As per the United Nations' plan.

Groundswell NZ represents our farmers, but this protest isn't just about farms, it's about the over-all loss of freedom. If you have any concerns relating to freedom of speech, mass surveillance by US tech giants and the NSA, or corruption in government or media, then you should attend. I attended the previous Groundswell NZ protest and found common ground with the people there. Their protests are some of the biggest in New Zealand history, but are down-played by the globalist-controlled media.

Antifa is concerned that so-called "far right" groups are brainwashing the farmers, but from what I've experienced, the farmers are already well-informed on all issues pertaining to the economic destruction and enslavement of New Zealand. Far right basically means that you want to defend your country and its people from globalist raids on your country's economy and way of life. This is different to being a shit-lib, because shit-libs don't care about their country, and prefer to spend their lives on PornHub, Netflix and comic-con events. These people and their ideas originate from big cities like LA, and pretty much anywhere on the US Eastern Seaboard. They don't bother to defend their national interest, because they consider it to be racist and "euro-centric".

This ideology is retarded because globalism doesn't care about culture or identity, and it will happily steam-roll and ruin all races and people, whether Maori or Pākehā. McDonalds, PornHub and Netflix are global parasites which have no regard for national interest or individual well-being. They thrive off atomised, alienated societies that suffer from a lack of orderly families. Global corporations and their social-engineering schemes are double-racist, because they attack both Maori and Pākehā while pitting these groups against each other in a fake, manufactured conflict.

New Zealand, it's time to wake up and realise that you're marked for extinction. "Your" politicians and "your" media don't care about you and want you dead. Please attend the protest on the 21st of November. At the very least visit my Gab TV channel which I pay \$160 for each year, and visit my website to access my other writing.
